

# SEMICON® EUROPA

NOV 14-17, 2023 | MUNICH, GERMANY

## Opening Ceremony

### Welcome Remarks

L. Altimime  
President  
SEMI Europe, Berlin, Germany

### Abstract

Coming Soon

### Biography

Laith Altimime, as President of SEMI Europe, leads SEMI's activities in Europe and the Middle East and Africa (EMEA). Altimime has P&L responsibility as well as ownership of all Europe region programs and events, including SEMICON Europa. He is responsible for establishing industry standards, advocacy, community development, expositions, and programs. He provides support and services to SEMI members worldwide that have supply chain interests in Europe. He manages and nurtures relationships with SEMI members in the region and globally as well as with local associations and constituents in industry, government, and academia. Altimime has more than 30 years of international experience in the semiconductor industry. Prior to joining SEMI in 2015, He held senior leadership positions at NEC, KLA-Tencor, Infineon, Qimonda and imec. Altimime holds an MSc from Heriot-Watt University, Scotland.

## Opening Remarks

A. Manocha  
President and CEO  
SEMI, Milpitas, California, United States of  
America

### Abstract

Coming Soon

### Biography

Throughout his career, Ajit Manocha has been a champion of industry collaboration as a critical means of advancing technology for societal and economic prosperity. He has been adept at forming strong partnerships with customers, suppliers, governments, academia, and communities for these efforts.

In his current role as President and CEO of SEMI, the global industry association serving the electronics manufacturing supply chain, Manocha has positioned the organization to tackle major challenges facing the industry by building up workforce development programs to address its growing talent shortage and lack of gender parity.

Previously, he held senior worldwide operations leadership roles at Philips Semiconductors (NXP) and Spansion before serving as President and CEO at GLOBALFOUNDRIES. He has served on the boards of SEMI, SIA, and GSA.

Manocha began his career as a research scientist at AT&T Bell Laboratories, where he was granted over a dozen patents related to semiconductor manufacturing processes that served as the foundation for modern microelectronics manufacturing.

Manocha was an advisor to President Obama on the Advanced Manufacturing Partnership Steering committee and on the President's Council of Advisors on Science and Technology (PCAST). In 2012, during his tenure at GLOBALFOUNDRIES, he was awarded the prestigious "EHS Achievement Award — Inspired by Akira Inoue" for his commitment and action on Environmental Health and Safety standards. Additionally, he has excelled in people development by teaching courses such as "Leadership by Example" and "Classroom to Cleanroom to Boardroom."

In December 2019, Manocha was named an "All Star of the Semiconductor Industry" by VLSI Research for his visionary leadership in restructuring SEMI from its traditional position to represent the expanded electronics supply chain. In February 2020, he was inducted into the Silicon Valley Engineering Hall of Fame.

## Topic Coming Soon

L. Van den hove  
President and CEO  
imec, Leuven, Belgium

### **Abstract**

Coming Soon

### **Biography**

Luc Van den hove is President and CEO of imec since July 1, 2009. Before he was executive vice president and chief operating officer. He joined imec in 1984, starting his research career in the field of silicide and interconnect technologies. In 1988, he became manager of imec's micro-patterning group (lithography, dry etching); in 1996, department director of unit process step R&D; and in 1998, vice president of the silicon process and device technology division. In January 2007, he was appointed as imec's EVP & COO. Luc Van den hove received his PhD in electrical engineering from the KU Leuven, Belgium. He has authored or co-authored more than 200 publications and conference contributions.

He was granted the 2023 IEEE Robert N. Noyce Medal for his leadership in creating a worldwide research ecosystem in nanoelectronics technology with applications.

## Topic Coming Soon

R. Dobson  
Corporate Vice President, EMEA  
Cadence, London, United Kingdom

### Abstract

Coming Soon

### Biography

Rebecca joined Cadence Design Systems in January 2020 as Corporate Vice President, leading the field engineering and sales teams across Europe and the Middle East.

Since graduating with a BSc (hons) Rebecca's career has been in high tech companies. Supporting customers across innumerable industries, but with a focus on Automotive, Infrastructure, Consumer Electronics, Industrial and Communications.

Rebecca has worked in a variety of blue-chip businesses and startups; all of which were successfully acquired due to their financial performance.

Prior to joining Cadence, Rebecca was Global SVP Sales and Marketing at Inmarsat, transforming the Enterprise Business Unit from a satellite network management business to a IoT solutions business.

Rebecca spent almost eleven years at Arm, the world's leading semiconductor IP company, where she was VP EMEA, leading sales and engineering teams across Europe, Middle East and India. Through her time at Arm Rebecca progressed her career from Global Account Management, managing one of Arms biggest customers, through to Director of Sales for various parts of Europe and finally VP EMEA.

Rebecca's early career was spent in several successful startups, where she drove growth, revenue and value resulting in acquisitions by some of the biggest names in technology.

Outside work, Rebecca enjoys cooking, gardening and interior design. As well as spending time with her young family.

## Boosting Technological Innovation and its Impact on Society – the Vital Role of RTOs

S. Dauvé  
CEA-Leti, Grenoble, France

### Abstract

More than ever before, the semiconductor has become a major economic and geopolitical issue, as well as one of sovereignty or climate.

In this context innovation has an essential role to play, not only in contributing to European sovereignty, but also in bringing about major technological breakthroughs.

Today, CEA Leti's teams are fully committed to meet these challenges through many joint programs with partners. In the end, the so called "FAMES" pilot line proposed for chips act should be a formidable launchpad for industrializing these innovations.

The presentation will provide an overview of current and future programs, as well as a timetable.

### Biography

Sébastien Dauvé was named CEO of CEA-Leti effective on July 1, 2021, after more than twenty years of experience in microelectronics technologies and their applications, including clean mobility, medicine of the future, cybersecurity, and power electronics.

Sébastien Dauvé started his career at the French Armament Electronics Center, where he worked on developing synthetic-aperture radar. In 2003, he joined CEA-Leti as an industrial transfer manager and supervised several joint research laboratories, in particular with the multinational Michelin.

In 2007, Sébastien Dauvé became a laboratory manager, then head of an R&D department in the area of sensors applied to the Internet of things and electric mobility. During this time, he supported the dissemination of new technologies in industry, including the automotive industry (Renault), aeronautics, national defense (SAFRAN), and microchips with the industry leader Intel. He played an active role in the creation of start-ups in application fields ranging from health to infrastructure security, leading to dozens of new jobs. In 2016, he became Director of the CEA-Leti Systems Division.

From sensors to wireless communication, Sébastien Dauvé has played an active role in the digital transformation, focused on coupling energy frugality and performance. He has made cross-disciplinary approaches central to innovation by harnessing the expertise of talented teams with diverse backgrounds. Their goal is to provide technological tools for meeting the major societal challenges of the future.

Sébastien Dauvé is a graduate of the French Ecole Polytechnique and the National Higher French Institute of Aeronautics and Space (ISAE-SUPAERO).

## Curiosity & Collaboration: Innovating Together for the Sustainable Progress of the Semiconductor Industry

S. Haferl  
Comet Group, Flamatt, Switzerland

### Abstract

In the ever-evolving semiconductor industry, where technological advancements shape the world around us, the need for sustainable progress has become increasingly vital, and collaboration an imperative catalyst for driving innovation.

Emphasizing the power of curiosity, we explore how cultivating a collective spirit of exploration and inquiry can lead to transformative solutions that address environmental and societal challenges. By fostering collaboration across the value-chain, from manufacturers to researchers, we can forge a path towards the disruption of the existing norms, and thus challenge status quo. Join the journey where curiosity meets collaboration, propelling us towards a sustainable tomorrow in the semiconductor industry.

### Biography

Stephan Haferl is the CEO of Comet Group since, a globally leading Swiss technology firm developing and producing innovative high-tech solutions based on x-ray and radio frequency for the semiconductor industry. With a strong track record and proven performance in business management, he is driving the company's transformation with focus on innovation, operational excellence and customer orientation.

Before joining Comet in 2007, where he was successfully working in various management positions, he held the positions of General Manager at Bartec-Meta Physics SA and Chief Operating Officer at Bartec Bacab SA.

Dr. Haferl is a distinguished alumnus of the prestigious Swiss Federal Institute of Technology (ETH), where he obtained his Master's degree in mechanical and process engineering. He furthered his academic journey by earning a Ph.D., cementing his technological expertise.

## Topic Coming Soon

K. Lauwers  
President Semiconductor Division  
Edwards, London, United Kingdom

### Abstract

Coming Soon

### Biography

**Koen Lauwers**, joined Atlas Copco in 1997, joining as a Calculation Engineer and has since then built a successful career in the Group, including international assignments in the United States and Germany. Koen joined Edwards in 2014 following the acquisition by Atlas Copco, taking the role VP of Marketing and focusing on the industry segment and implementation of synergies. In 2017 he was appointed President of the Industrial Vacuum division, before being announced as the new President of the Semiconductor division on March 30, 2023.

Koen holds a Master's Degree in Electro-Mechanical Engineering from the University of Leuven in Belgium and an MBA from the Antwerp Management School in Belgium.
