2019 & 2020 Semiconductor Equipment and Materials Market: Where are we headed?

L. Chamness
Senior Manager Market Analysis
SEMI, South Milpitas Blvd 673 CA 95035 Milpitas,
United States

Abstract

2018 was truly a remarkable year for the industry, with the semiconductor, equipment, and materials markets all experiencing record levels. However, all good things must come to an end; headwinds in the form of excess inventory, memory pricing and trade tensions are negatively impacting the outlook for this year. This presentation will discuss the 2019 fab and materials markets and provide a forecast through 2020 for these markets.

Biography

Ms. Lara Chamness is a Senior Manager Market Analysis at SEMI® and is responsible for SEMI's data collection programs for equipment and materials. This includes leading interactions with SEMI's participating companies, partners and subscribers. Ms. Chamness has 19 years of industry experience and earned BA/MS degrees in environmental sciences and a MBA degree from Santa Clara University.
